ACCESSORIES — order as separate catalog numbers (shipped separately)										
ICO20PTC XXD	Additional optics for field installation. Replace "XX" with beam angle.									
ICO2OPTC KIT	Kit including a field interchangeable optic for each of the 13 preset beam distribution patterns									
HS258	2-5/8" Hole saw									
HS234FL	Hole saw for flush mount trim option									
SDT 347/120 75VA	347V/120V, 75VA step down transformer. Must be remote mounted.									
AW50	Allen wrench (.050") for adjusting tilt									

# ORDERING NOTES

- 1. 5000K CCT not available with 90CRI
- 2. Refer to <u>Tech 240</u> for compatible dimmers.
- 3. Not available with Control Interfaces (nLight). Not compatible with spray foam with 1000LM, 1500LM, or 2000LM options.
- 4. Field installed. Access required to location of remote mounted device
- 5. ER for use with generator supply power. Will require an emergency hot feed and normal hot feed.
- 6. NCH is required for T-grid ceilings or where code requires.

- 7. Not available with 1500lm or 2000lm
- 8. Not available with 1500lm
- 9. Requires NLT or NLTER.
- 10. WL requires a lens (e.g. SOL)

SPECIFICATIONS

### Optical and Trim Assembly

Fully serviceable and upgradeable lensed LED light engine suitable for field maintenance or service from above or below the ceiling.

Flangeless trim option includes proprietary Gotham mud ring enabling seamless integration into drywall applications. Mud ring ships separately. Superior 100% Virgin-silicone refractive optic, enables maximum dimensional stability and optical transmission with no discoloration over life. Field inter-changeable optics.

45° reverse knife edge along luminous aperture to eliminate flash.

gotham°∣г к с г т о<sup>∞</sup>

Fully black interior to conceal hardware. Wet paint finish.

# Electrical

The luminaire shall operate from a 50 or 60 Hz  $\pm$ 3 Hz AC line over a voltage ranging from 120 VAC to 277 VAC. Support 347V via remote-mounted stepdown transformer. The fluctuations of line voltage shall have no visible effect on the luminous output.

The luminaire shall have a power factor of 90% or greater at all standard operating voltages and full luminaire output.

Sound Rated A+. Driver shall be >80% efficient at full load across all input voltages.

#### Controls

Luminaire shall be equipped with interface for nLight wired or nLight AIR networks with integral power supply as per specification.

#### Dimming

The luminaire shall be capable of continuous dimming without perceivable stroboscopic flicker as measured by flicker index (ANSI/IES RP-16-10) over a range of 100 - 1.0% of rated lumen output with a smooth shut off function to step to 0%.

Driver is inaudible in 24dB environment, and stable when input voltage conditions fluctuate over what is typically experienced in a commercial environment.

#### Construction

Light engine and driver are accessible from below ceiling.

Several additional mounting options available including a structural reinforcement pan, Chicago plenum, and Type IC.

Anodized extruded aluminum wiring compartment with hinged access. With two 1/2" trade-sized knockouts rated for 90°C.

Accommodates between 1/2" to 3/4"-thick ceilings.

#### Listings

Fixtures are UL Certified to meet US and Canadian Standards: All fixtures manufactured in strict accordance with the appropriate and current requirements of the "Standards for Safety" to UL, wet location covered ceiling. ENERGY STAR® Certified product.

IC rated with ICAT option. Fixtures with ICAT option are compatible with spray foam insulation with an R-value of 4.3 per inch or less. Luminaire configurations are Energy Star certified through testing in EPA–recognized laboratories, with the results reviewed by an independent, accredited certification organization. Visit <u>www.energystar.gov</u> for specific configurations listed

#### Photometrics

LEDs tested to LM-80 standards. Measured by IESNA Standard LM-79-08 in an accredited lab. Lumen output shall not decrease by more than 30% over the minimum operational life of 60,000 hours.

Color appearance from luminaire to luminaire of the same type and in all configurations, shall be consistent both initially and at 6,000 hours and operate within a tolerance of <2.5 MacAdam ellipse as defined by the center of the quadrangles defined in ANSI C78.377-2015.

#### **Buy American**

This product is assembled in the USA and meets the Buy America(n) government procurement requirements under FAR, DFARS and DOT. Please refer to <u>www.acuitybrands.com/buy-american</u> for additional information.

#### Warranty

5-year limited warranty. Complete warranty terms located at: www.acuitybrands.com/support/customer-support/terms-and-conditions

#### Note:

Actual performance may differ as a result of end user environment and application. All values are design or typical values, measured under laboratory conditions at 25 °C.

# **\*\*** Capable Luminaire

This item is an A+ capable luminaire, which has been designed and tested to provide consistent color appearance and out-of-the-box control compatibility with simple commissioning.

- All configurations of this luminaire meet the Acuity Brands' specification for chromatic consistency
- This luminaire is part of an A+ Certified solution for nLight<sup>\*</sup> control networks when ordered with drivers marked by a shaded background\*
- This luminaire is part of an A+ Certified solution for nLight<sup>\*</sup> control networks, providing advanced control functionality at the luminaire level, when selection includes driver and control options marked by a shaded background<sup>\*</sup>

To learn more about A+, visit <u>www.acuitybrands.com/aplus</u>.

2-3/4" [7] flangeless

Partially finished mud ring, showing cross-section detail.

An ICO downlight requires only approximately 3" of plaster to finish.

ICO with flangeless trim

#### **Flush Mount Installation**

11

Gotham's flush mount option utilizes a micro-thin polymer mud ring that minimizes the amount of drywall compound required to finish the ceiling. The end result is a virtually undetectable flush mount downlight installation.

The polymer mud ring is installed independent of the of the recessed frame, therefore floating with the ceiling. This innovation minimizes any surface cracks during reflector installation, ceiling movement and any future service to the recessed frame, wiring, electronics, etc.
