PRODUCT DESCRIPTION

The Trac 12 LED Mini-Flood approximates the lumen output and light distribution of 20W halogen flood, utilizing less than 1/4 of the energy and having a rated life of 50,000 hours. Available in 3000K and 4000K color temperatures, the white-light TL103L Series is compatible with standard Trac 12 and Trac 12/25 trac, operating with 12V AC power. The TL103L can be placed anywhere along the Trac, plus it can be rotated and aimed in any direction, making the Trac 12 LED Mini-Flood fixture a versatile linear lighting choice. It can also be used within display cases and cabinets, providing a crisp wash of light over the illuminated objects.

PERFORMANCE DATA¹

Catalog Number	Input Voltage	Watts (Maximum)	Lumens	Efficacy (LPW)	Rated Life (Hours)
TL103L 30K	12.0V	4.4W	192	44	50,000
TL103L 40K	12.0V	4.4W	217	49	50,000

¹Performance data, including Rated Life, is based on measurements of an individual fixture operating in a 25°C ambient. In practice, multiple fixtures used in a system will average slightly lower power consumption due to voltage drop within the system.

Note: For operation at 11.5 volts multiply Lumens by 0.94.

Cabinetry Lighting Guidelines

Over Cabinets Trac 12, using TL103Ls spaced 12" on-center, generally provides excellent indirect lighting. For lower-level mood lighting, use TL103Ls with closer lamp spacing. Placing the fixture at the front edge of the cabinet top will project light into the space and illuminate any displayed objects. Locate top of lamp even with top edge of cove molding to prevent a harsh shadow line.

Under Cabinets Placing Juno Trac 12 at the front lip of the cabinet conceals the fixture from view, minimizes veiling reflections, and provides maximum light on the working area of the countertop.

²Data shown is for operation at 12-volts. For operation at 11.5-volts, multiply by 0.94.

³Based on 20% maximum light output decrease between first and last fixture on trac due to voltage drop; to utilize full capacity of trac and transformers, individual transformer circuits may have to feed multiple runs using separate feed points.
