### Description

The MSL Series LED Security Light is a small and unobtrusive fixture designed to replace small incandescent and CFL fixtures. With a shallow profile, the fixture blends in seamlessly with both architecture and nature. The wide light pattern makes this fixture a great choice for commercial and residential applications where an economical LED security light is needed. The MSL Series is rated for outdoor or indoor use.

### Features

**Optics** White reflector and micro-prism lens reduces glare, increases visual comfort and acts as an environmental seal

**Dark Sky Compliance** Compliant with Dark Sky ordinances

**Construction** Die cast aluminum housing

**Thermal Management** LED light source is secured to the aluminum housing that acts as a heat sink • Driver is mounted directly to the housing to help keep the electronics cool • Ensures 50,000 hour L70 performance at 25° ambient

**Electrical** Suitable for 120VAC 50/60 Hz • Optional photo sensor is available

**Finish** Available in White or Bronze polyester powder coat finish

**Mounting** Mounts directly to a junction box

**Certification** Certified to UL1598/CSA C22.2 250  
• Suitable for wet locations
