

Recessed and Trac Lighting

INSTALLATION INSTRUCTIONS

120V Monopoint Pendant

IMPORTANT SAFETY INSTRUCTIONS

1. Read all instructions completely before beginning installation. Keep these instructions in a safe place for future reference.
2. To reduce risk of fire and over-heating, make sure all connections are tight.
3. Turn off the electrical power before modifying the lighting system in any way.

SAVE THESE INSTRUCTIONS

1. Mount JBox strap to junction box using screws provided.
2. Connect field ground wire to green ground screw on strap (if applicable).
3. Route pendant cord as shown through the finial, canopy cover, threaded nipple and strain relief. Securely tighten set screw on strain relief to hold cord in place.
4. Connect field wires to pendant cord using appropriately sized wire nuts. (Note that pendant has 18 AWG stranded wires). Connect white cord wire to field neutral & black cord wire to field hot. Connect the green cord wire to the bare copper ground wire using the wire nut provided.
5. Position cover at ceiling and tighten finial onto threaded nipple. Finial must be securely tightened to maintain proper grounding of the cover. Tighten finial by hand. Use gloves to avoid fingerprints.
