

# **FEATURES & SPECIFICATIONS**

**INTENDED USE** — Ideal one-for-one replacement of conventional lighting systems such as HID and fluorescent. For use in light Industrial applications such as, warehousing and other large indoor spaces with mounting heights ranging from 10' – permitted. **Certain airborne contaminants can diminish integrity of acrylic and LED's.** <u>Click here for Acrylic Environmental Compatibility table for suitable uses</u>.

Certain airborne contaminants may adversely affect the functioning of LEDs and other electronic components, depending on various factors such as concentrations of the contaminants, ventilation, and temperature at the end-user location. <u>Click here for a list of substances that may not be suitable for interaction with LEDs and other electronic components</u>.

**CONSTRUCTION** — Extruded aluminum channels enable superior thermal performance. Glare Control acrylic lens diffuses light source and reduces glare while protecting LEDs. Lens meets DLC 5.1 standards for UGR (Unified Glare Rating).

**ELECTRICAL** — 70% lumen maintenance at > 100,000 hours. Thermally protected driver standard with 0-10V dimming. Luminaire surge protection level: designed to withstand up to 6kV/3kA per ANSI C82.77-5-2015 Multi-volt driver, 120-277V standard.

**INSTALLATION** — Fixture is suitable for mounting by chain, cable, surface-mount bracket, pendant monopoint, or hook monopoint. Designed for use in ambient temperatures ranging from -40°C to 55°C when suspended 18" off ceiling. Surface mount to 45°C ambient operation.

LISTINGS — CSA listed. Damp location listed.

DesignLights Consortium<sup>\*</sup> (DLC) Premium qualified product. Not all versions of this product may be DLC Premium qualified. Please check the DLC Qualified Products List at <u>www.designlights.org/QPL</u> to confirm which versions are qualified.

**BUY AMERICAN ACT** — Product with the BAA option is assembled in the USA and meets the Buy America(n) government procurement requirements under FAR, DFARS and DOT regulations. Please refer to <u>www.acuitybrands.com/buy-american</u> for additional information.

WARRANTY — 5-year limited warranty. This is the only warranty provided and no other statements in this specification sheet create any warranty of any kind. All other express and implied warranties are disclaimed. Complete warranty terms located at: <a href="http://www.acuitybrands.com/support/warranty/terms-and-conditions">www.acuitybrands.com/support/warranty/terms-and-conditions</a>

**Note:** Actual performance may differ as a result of end-user environment and application. All values are design or typical values, measured under laboratory conditions at 25 °C. Specifications subject to change without notice.

#### 🧶 LITHONIA LIGHTING

|                            | toption Value Ordering Restrictions  |
|----------------------------|--|
| Option Value               | Ordering Restrictions  |
| 18000LM                    | Not available with HVOLT. When 18000LM requires 347 or 480 volt; the fixture utilizes a step-down transformer.   |
| 347                        | Fixture includes an additional 10kV surge protector. When ordered with 18000LM, includes step down transformer.  |
| 480                        | Fixture includes an additional 10kV surge protector. When ordered with 18000LM, includes step down transformer.  |
| 90CRI                      | Not available with HEF options.  |
| Cord Sets                  | Must specify voltage on cord sets with plugs. To get CPHB wired from the factory for 24/7 operation (via cords et or Reloc), with on/off controlled by sensor rather than switch, contact your factory representative to request the normal hot and unswitched hot wired together n the fixture. Consult local codes to determine if this is allowable.  |
| Cord Sets for IMP          | Fixture must be ordered with IMP option. All cord sets are 18/3, 6' white.   |
| CPHBPMPSM/MD/LG            | Pendant monopoint splice boxes will require wiring from access plate to splice box KO if power is being dropped through pendant conduit. Fixture does not have a KO in center to pull power out of driver channel through splice box.  |
| Emergency Options          | MVOLT only. May alter fixture construction. Consult line art for dimensions. Batteries not for use with surface mount or pendant mount option. If cord set is needed, use CNP4CW which will have normal hot and unswitched hot exiting cord set. Not available with IMP or ETS option.   |
| E10WCP                     | MVOLT only. Max ambient operating temperature of 35°C. Includes an additional 10kV surge protector on the unswitched, battery hot.   |
| E15WMCP                    | MVOLT only. Factory installation only. Not approved for field installation. Max ambient operating temperature of 35°C. Includes an additional 10kV surge protector on the unswitched, battery hot.   |
| ETS                        | MVOLT only. Not available with cord sets or batteries. When sensor is required, use "ER" sensor option. Utilizes ETS 924 DR component. Includes an additional 10kV surge protector   |
| HVOLT                      | Fixture includes an additional 10kV surge protector. Not valid with 18000LM.   |
| IE10WMCP                   | Available with 347 or 480 only.  |
| IE15WMCP                   | Available with 347 or 480 only. Not available for 9000LM, 12000LM, 15000LM, or 18000LM.  |
| IMP                        | Not available with battery options, NLTAIR2 RPP20 D options, LSXR ER options, ETS, or NLTAIR2 RLSXR ER options. Sensors will be fixture pre-wired to fixture.  |
| Individual Controls (LSXR) | Comes standard with SPD. This sensor configuration is suitable for minimum ambient temperature of 14°F (-10°C). Not available with other controls.   |
| JP                         | Consult table on page 7 for details.   |
| NLTAIR2 RMSOD              | When HVOLT, 347, and 480 are ordered fixture utilizes fixture back pack. Not available with battery options when 347, 480 or HVOLT are ordered. Not available with ETS when ordered with 9000LM, 12000LM, 15000LM or 18000LM lumen packages. Available with EM option by adding EM to nomenclature. Ex: NLTAIR2 RMS0D45 EM. When EM option is ordered, not available with emergency battery packs. |
| OCS                        | Must specify voltage. Dry Location listed only. Not available with Battery Options.  |
| 0CS4C                      | Dry location listed only. Use when unswitched hot is required for battery pack options.  |
| SPD                        | 10kV surge protector standard with HVOLT, 347, 480, ETS, LSXR, RLSXR, RPP20, and battery options (on the unswitched, battery hot).   |
| THUN J2                    | Order quantity required in multiples of two. 9000LM - 18000LM requires one per fixture, 24000LM - 60000LM requires two per fixture.  |

\*All ER solutions include standard sensor or control device with a factory-installed lota ETS##-DR (UL924 bypass device). This device is integral to the fixture and will include a hot and neutral lead for the dedicated emergency circuit. MVOLT, 120-277 only. ER solutions are not available with the IMP option.

🧶 LITHONIA LIGHTING

#### LSXR — Fixture Mount Occupancy Sensor (see <u>www.</u> AcuityControls.com for additional information)

- Three interchangeable lens options to satisfy multiple mounting heights and coverage pattern requirements.
- Integrated mounting bracket drops lens down 3" from chase nipple.
- Single or dual relay versions designed with robust protection from the harsh switching requirements of T5 and LED loads.
- Photocell and 0-10VDC dimming options.
- No PIR field calibration or sensitivity adjustments required.
- Sensor ambient temperature rating of 14°F (-10°C) to 131°F (55°C).

4.6

# LSXR COVERAGE PATTERNS

#### HIGH MOUNT 360° LENS (#6)

- Best choice for 15 to 45 ft (4.57 to 13.72 m) mounting heights
- 15 to 20 ft (4.57 to 6.10 m) radial coverage overlaps area lit by a typical high bay fixture
- Excellent detection of large motion (e.g. walking) up to a 35 ft (10.76 m) mounting height
- Excellent detection of extra large motion (e.g. forklifts) up to a 45 ft (13.72 m) mounting height

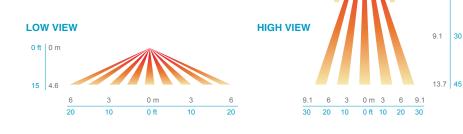

## **HIGH MOUNT AISLEWAY LENS (#50)**

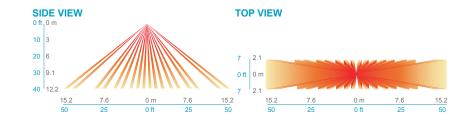

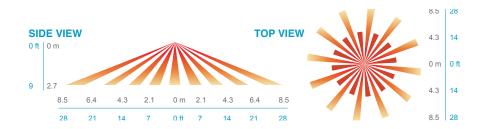

- Provides a bi-directional coverage pattern ideal for warehouse racking
- 1.2xmounting height equals approximate detection range in either direction
- Typical 40 ft (12.19 m) mounting detects 50 ft (15.24 m) in either direction
- Superior aisleway coverage compared to a masked 360° lens

### LOW MOUNT 360° LENS (#10)

- Best choice for large motion detection (e.g. walking)
- 360° conical shaped pattern
- Provides ~24ft (7.32 m) radial coverage (~2000 ft2) when mounted at 9 ft (2.74 m)
- 7 to 15 ft (2.13 to 4.57 m) mounting heights provide 16 to 36 ft (4.88 to 10.97 m) radial coverage
- Detection range improves when walking across beams compared to into beams

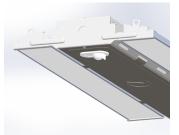

🝊 LITHONIA LIGHTING

#### HALEON - Integrated Occupancy Sensor with Bluetooth® Programmability

- Programmable sensor settings over Bluetooth<sup>®</sup> with Acuity VLP smartphone app.
- Default programming options to service various application spaces occupancy detection, 0-10V dimming and daylight harvesting.
- 360° High Mount and High Mount Aiselway lens detection options for mounting heights up to 40 ft.
- Integrated retractable lens mask included to block unwanted detection.
- Sensor ambient temperature rating of -40°F (-40°C) to 158°F (70°C).

- Detection range improves when walking across beams compared to into beams

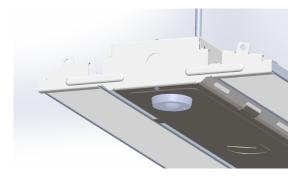

0 m | 0 ft

# **CPHB** LED High Bay

#### RMSOD

- 100% digital PIR detection
- Combined daylight and occupancy sensor
- Fully dimmable via digital or analog dimming protocols, providing the right amount of light for the application and to optimize energy savings
- Optional UL 924 emergency functionality via EM option, which eliminates wiring for sensing normal power

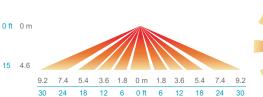

# **COVERAGE PATTERN**

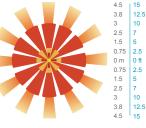

Lens rotates 15 deg to enable adjustment. Initial detection will occur earlier when walking across sensor's field of view than when walking directly at sensor.

#### 7 - MINI LOW-BAY 360°

- Recommended for walking motion detection from mounting heights between 8 ft (2.44 m) and 20 ft (6.10 m)
- Initial detection of walking motion along sensor axis at distances of 2x the mounting height up to 15 ft (4.57 m)and 1.75x up to 20ft (6.10 m).
- Provides 12 ft (3.66 m) radial detection of small motion when mounted at 9 ft (2.74 m)

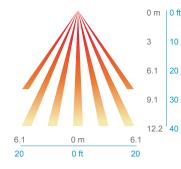

SIDE VIEW

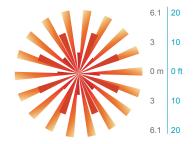

TOP VIEW

#### 30 - UNIVERSAL 360°

- Provides excellent detection of large motion (e.g. walking) when mounted between 15 to 40 ft (4.57 to 12.19 m)
- 15 to 20 ft (4.57 to 6.10 m) radial coverage overlaps area lit by a typical high bay fixture
- Recommended for fixtures that have a 1:1 spacing to mounting height ratio or less (e.g. fixtures 30' on center or less @ a 30' mounting height).)

#### 45 - HIGH MOUNT 360°

- Optimized full coverage pattern for 10 40 ft. (3.1 12 m)
- Reliable detection of large motion (e.g. pedestrian walking traffic) up to 30 ft. (9.1 m) mounting height
- Reliable detection of extra-large motion (e.g. forklift traffic) up to 40 ft. (12 m) mounting height

# **IMP** - Integrated Modular Plug

- The integrated modular plug (IMP) option allows the installer to plug and play a multitude of accessories.
- Cord sets connect quickly to any fixture with IMP option.
- IMP accessories include occupancy sensors, photocells, X-point relays.

Notes

1 Cord set required for fixture operation. All cord sets are 18/3, 6' white.

## **RRL - RELOC®-Ready Luminaire**

- RRL connectors to be used with the OnePass system.
- Load side of connector factory installed to luminaire.
- 4-pole mating connector with push-in terminations allows for simple installation.
- Touch-safe design on both halves meets UL/CSA requirement.
- Wiping contact design allows safe disconnect under load.

| ORDE   | ORDERING INFORMATION Lead times will vary depending on options selected. Consult with your sales representative. Example: R |   |  |
|--------|---|---|--|
|        |   |   |  |
| Series |   | Wiring instructions   |  |

# **Compatible RELOC® Cables for Industrial Luminaires** (ordered and shipped separately) (click to view RELOC product page for more information)

#### Notes

 AE commercial fixtures should disconnect the TSPL before unplugging the RRL so it does not go into discharge mode. Requires fixture to have battery option.

2 C12S option is used with the OnePass for O-10V/DALI applications. Not for use with dimming sensors.
